

LENS HOOD

THANK YOU FOR CHOOSING VELLO

This Vello dedicated lens hood is custom-tailored to your camera's lens. The lens hood mounts directly to your lens and accommodates its exact angle of view. It prevents glare and lens flare by blocking stray light. It also adds shock absorption to help protect your lens from impact damage.

Please read the instructions on the other side of this card before mounting the Vello dedicated lens hood.

MOUNTING THE VELLO LENS HOOD

1. Remove the front cap from your lens.
2. Remove your lens' front lens adapter ring by rotating the adapter ring counterclockwise. (See illustration.)

3. Align the Vello lens hood's bayonet mount with your lens.
4. Mount the Vello lens hood onto your lens and rotate the lens hood clockwise until it locks into place.
