

AMAZFIT GTR smartwatch user guide

By Joe Horner 2019-07-22 4645 0

AMAZFIT GTR, which has attracted a lot of attention since its launch, is now available on Gearbest, and consumers can buy AMAZFIT GTR 47mm International at Gearbest. In the process of using, the user is sure to encounter some operational problems, now let's explain it.

Watch operating instructions

●Button descriptions

The AMAZFIT GTR smartwatch have two operate keys, you can operate the watch by it.

●Touch screen gesture operations

The AMAZFIT GTR smartwatch support touch control, you can control your AMAZFIT GTR by tips below.

Gestures	Meaning
Tap the screen	function items Use this feature to go to the next item or select the current item
Slide the screen	left and right Switch left and right the interface
Swipe the screen up and down	Scroll up and down the interface
Long press the watch-face interface	Activate the watch-face selection function

System status symbol

Once your smartwatch is unlocked, the watch face will display system status symbols, each of which represents a different status.

	In the charging state.
	In a fully charged state.
	In a low-battery protection state. When the watch power is 5% or below, it will enter the low-battery protection mode. At this time, the watch must be charged more than 5% before exiting the protection mode.
	The watch is disconnected from the mobile phone. When Bluetooth broadcasting is turned off on the phone or the Bluetooth is disconnected because the watch is too far away from the phone, or the flight mode is enabled on the watch, the watch-face interface will display this symbol.
	DND mode is turned on. When this mode is turned on, the watch will not automatically display and vibrate after receiving a message, call, etc.
	Flight mode is turned on. When the flight mode is turned on, the watch will turn off the Bluetooth and Wi-Fi connection. In this mode, the watch will be disconnected from the mobile phone.
	The watch is connected to a Bluetooth headset. This will increase system power consumption.
	The watch is playing music. If the watch is not connected to a Bluetooth headset, the music will be played via the speakers that come with the watch.

How to wear my AMAZFIT GTR smartwatch?

•Daily wear

To ensure that the optical heart-rate monitor detects the data properly, we recommend wearing the watch with two fingers' width below your wrist bone, making sure it's fairly snug against your skin.

•Exercise wear

When running or doing other activities, it is recommended that you wear your watch with a tight fit that is comfortable and does not slide up or down your wrist. The watch band shouldn't be too tight, nor should it be allowed to shake freely.

How to charge my AMAZFIT GTR smartwatch?

Step 1: Connect the watch to the charging dock and then attach the other end of the USB cable to the USB power adapter.

Step 2: Then, the charging status will be displayed on the watch. Note that the direction of the charging contact on the dock should be consistent with the direction of the metal contacts on the watch during the connection.

Once insertion is made, the watch will not loosen out of the dock. The watch will automatically turn off the display when charging, tap the screen to display the charging progress interface.

Charging requirements: It is recommended that you use the USB port on your computer or a branded mobile phone charger for charging. The rated input voltage of the mobile phone charger must be DC 5.0V, and the input current must be greater than 500mA.

How to set the watch notifications?

When the watch is connected to the phone, the message on the phone can be displayed on the watch.

Steps: To enable AMAZFIT App notifications: enable the specific notifications for Apps in "App Notification Settings" in "**Profile**" > "**Settings**" > "**Notification Settings**" from the Amazfit App.

Note: If you bind your Android mobile phone to your watch, please open Amazfit Watch App and give it permission for auto-start.

- Keep the App running in the background so that you can receive notifications.
- If the Amazfit Watch app is shut down in the background, your watch will disconnect from the app and you will no longer receive notifications.
