## NANO COATING WIPE

PRODUCT OF GERMANY

## LIQUIDNANO™

SMART COATINGS - GUARANTEED PROTECTION

### PRODUCT WARNING:

Keep out of reach of children and sources of ignition.  
In case of contact with eyes, rinse immediately with  
clean water and seek medical advice.

### 1 PRE-CLEANING DEVICE SCREEN

**STEP 1** Thoroughly clean all glass surfaces with the Cleaner supplied in Sachet 1. Remove all traces of adhesive residue from any previously applied screen protector.

**STEP 2** Allow device to fully dry.

**STEP 3** Ensure you remove all traces of the cleaner by buffing the glass thoroughly with the microfibre towel supplied.

**Any adhesive residue or cleaner trace left on the glass surface will adversely affect the ability of LIQUIDNANO™ to bond to the glass.**

### 2 APPLYING THE NANO COATING

**For optimal results, apply LIQUIDNANO™ to your mobile device last thing at night to allow maximum drying and bonding time.**

**STEP 1** In a circular motion, apply LIQUIDNANO™ to all glass surfaces using the coating wipe supplied in Sachet 2. Make sure screen is completely coated including edges.

**STEP 2** Allow glass surface to cure for at least 30 minutes. When dry a residue will be visible on the glass.

**STEP 3** Once fully dry remove any excess residue with the microfibre towel supplied.
